Scenario Block Options ▾

Scenario In this study, you will be role playing the following scenario:

 Your friend graduated in accounting and you have asked their help in preparing your taxes. They told you that they needed you to email them your last year's tax PIN and your social security number. Since this information is sensitive, you want to protect (encrypt) this information when you send it over email.

You will be asked to send this information using three different secure email systems. In each task, you'll be told which system to use and assigned a new PIN and SSN. After correctly sending the information, your friend will reply to you with a confirmation code that can be used to continue with the study.
